## EDUCATION

Master's degree in Mining and underground construction

**National Mining University(NMU),  
Dnipro, Ukraine**

2007 - 2012

## LANGUAGE

English - Intermediate

## About Me

Front-end developer with a background in full-stack development, specializing in JavaScript and React. Built 4 responsive web projects during training, including landing pages, a game, and a product catalog, all fully optimized for mobile devices. Improved project performance with Lighthouse scores of 90+. Passionate about pixel-perfect design and detail-oriented implementation. Intermediate level in English and eager to contribute to innovative front-end projects in a collaborative environment.

## Experience

Frontend Developer – Independent Projects  
Sep 2024 – Present

### Portfolio:

**Bang & Olufsen** – Modern Interior Design Website.  
Sep 2024 - Oct 2024

- Implemented responsive layout from Figma using HTML, CSS, and BEM → achieved 95+ Lighthouse performance score.
- Optimized cross-browser compatibility and mobile responsiveness → ensured seamless UX on desktop and mobile.
- **Technologies:** HTML, CSS, BEM
- [Demo](#)
- [GitHub Code](#)

**Creative Bakery** – Modern Interior Design Website.  
Apr 2025 - May 2025

- Built a modern responsive landing page with a focus on pixel-perfect design and cross-browser compatibility.
- Applied semantic HTML and optimized styles → reduced load time by ~30%.
- **Technologies:** HTML, CSS, BEM
- [Demo](#)
- [GitHub Code](#)

**2048 Game** – Classic Number Puzzle Challenge.  
Nov 2024 - Dec 2024

- Developed a fully functional 2048 puzzle game in vanilla JavaScript → implemented game logic and smooth animations
- Enhanced performance with optimized DOM updates → stable gameplay at 60 FPS.
- **Technologies:** JavaScript, CSS, HTML
- [Demo](#)
- [GitHub Code](#)

# ACHIEVEMENTS

---

- Solved 50+ katas on [Codewars](#)
- Achieved 90+ Lighthouse scores across projects

**React Phone Catalog** – An interactive catalog with a cart, filters, and detailed product information.

Jan 2025 - Apr 2025

- Built product catalog app with filtering, sorting, and responsive UI in React & TypeScript → improved usability and navigation.
- Applied modular structure and reusable components → reduced code duplication by ~25%.
- **Technologies:** React, TypeScript, JavaScript, CSS
- [Demo](#)
- [GitHub Code](#)
